PROFILE

Master's student in social sciences (media & communication) at the University of Lausanne and a self-taught software builder. I design and ship real, working web applications — using modern AI-assisted development — from a six-language in-browser code school to a prompt-to-Excel generator. Reliable, adaptable and fast-learning, with hands-on retail and customer-service experience. Native French & English.

SELECTED PROJECTS

THE CONSTRUCT LIVE

A hacker-terminal code school teaching six languages (Python, JS, TypeScript, SQL, Lua, Ruby), each running a real engine in the browser. Live demo online.

floriansumi-bot.github.io/the-construct

SheetGenie IN DEV

A PWA that turns a plain-language request into a real, downloadable Excel workbook — formulas, charts, conditional formatting; reads data from photos & PDFs.

SAPE IN DEV

A "Swiss Vinted" second-hand marketplace — full-stack web app with accounts, listings and messaging; trilingual (FR/DE/IT).

HyperFractal & Barathon IN DEV

An infinite-zoom fractal/projection-mapping visualizer for live shows; and a bar-crawl app covering every bar in Switzerland (React Native).

EXPERIENCE

Salesman & Cashier · [Cash n Go](#)

Second-hand retail: customer advice, stock handling and valuation, accurate cash management.

Technical Documentation Intern · [LNS, Orvin](#)

Produced and structured technical documentation in the machine-tool domain.

Logistics Intern · [Rolex SA, Geneva](#)

Inventory management and parcel preparation and dispatch.

Landscaping Intern · [Marco Cellerini](#)

Hands-on landscaping and grounds work.
